

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (Currently Amended) A thermoplastic resin composition that is capable of exhibiting a flammability rating of V-0 or V-1 pursuant to UL94 when present in a thickness of 0.8 mm[[.]] prepared by compounding 100 parts by weight of (A) a thermoplastic resin which does not form an anisotropic melt phase, 15 to 45 parts by weight of (B) a liquid crystalline polymer which can form an anisotropic melt phase, (C) a flame-retardant component comprising 5 to 20 parts by weight of (C-1) a phosphor-based flame-retardant and 1 to 15 parts by weight of (C-2) a silicone rubber, and 10 to 80 parts by weight of (D) a filler, wherein a ratio (C-1)/(C-2) ranges from [[1]] 1.4 to 2.

2. (Previously Presented) The thermoplastic resin composition according to Claim 1, wherein (C-1) the phosphor-based flame-retardant is a phosphate ester represented by the following formula (1):

wherein R¹ to R⁴ are each an aryl group which may have a substituent group; Z¹ is a divalent aromatic group; and p is an integer of 1 to 5.

3. (Previously Presented) The thermoplastic resin composition according to Claim 1, wherein (C-2) the silicone rubber is a silicone rubber formed by cross-linking organopolysiloxane.

4. (Previously Presented) The thermoplastic resin composition according to Claim 1, wherein (C-2) the silicone rubber has an average particle diameter ranging from 1 to 20 μm .

5. (Previously Presented) The thermoplastic resin composition according to Claim 1, further compounding 0.1 to 1 part by weight of (E) a dispersing agent relative to 100 parts by weight of (A) the thermoplastic resin.

6. (Original) The thermoplastic resin composition according to Claim 5, wherein (E) the dispersing agent is a phosphorus oxo acid monoester or a phosphorus oxo acid diester.

7. (Previously Presented) The thermoplastic resin composition according to Claim 1, wherein (A) the thermoplastic resin is a polycarbonate resin.

8. (Previously Presented) The thermoplastic resin composition according to Claim 1, further compounding 0.1 to 1 part by weight of (F) a

fluorine-based resin relative to 100 parts by weight of (A) the thermoplastic resin.

9. (Previously Presented) The thermoplastic resin composition according to Claim 1, wherein at least one of (D) the filler is a glass fiber.

10. (Previously Presented) An injection-molded article comprising the thermoplastic resin composition according to Claim 1.

11. (Previously Presented) An injection-molded article for a thin-walled housing comprising the thermoplastic resin composition according to Claim 1.

12. (Previously Presented) The thermoplastic resin composition according to Claim 2, wherein (C-2) the silicone rubber is a silicone rubber formed by cross-linking organopolysiloxane.

13. (Previously Presented) The thermoplastic resin composition according to Claim 2, wherein (C-2) the silicone rubber has an average particle diameter ranging from 1 to 20 μm .

14. (Previously Presented) The thermoplastic resin composition according to Claim 3, wherein (C-2) the silicone rubber has an average particle diameter ranging from 1 to 20 μm .

15. (Previously Presented) The thermoplastic resin composition according to Claim 2, further compounding 0.1 to 1 part by weight of (E) a dispersing agent relative to 100 parts by weight of (A) the thermoplastic resin.

16. (Previously Presented) The thermoplastic resin composition according to Claim 2, wherein (A) the thermoplastic resin is a polycarbonate resin.

17. (Previously Presented) The thermoplastic resin composition according to Claim 2, further compounding 0.1 to 1 part by weight of (F) a fluorine-based resin relative to 100 parts by weight of (A) the thermoplastic resin.

18. (Previously Presented) The thermoplastic resin composition according to Claim 2, wherein at least one of (D) the filler is a glass fiber.

19. (Previously Presented) An injection-molded article comprising the thermoplastic resin composition according to Claim 2.

20. (Previously Presented) An injection-molded article for a thin-walled housing comprising the thermoplastic resin composition according to Claim 2.
